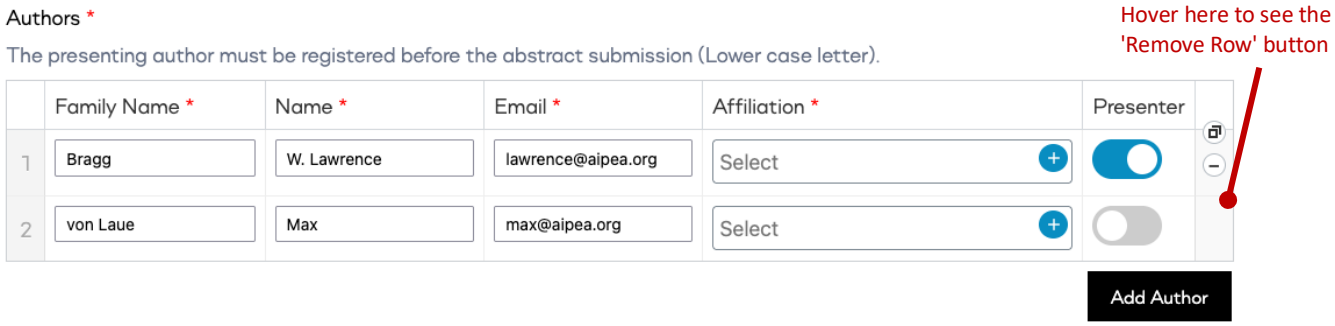
Before starting your abstract submission, make sure you have the email addresses of all authors.

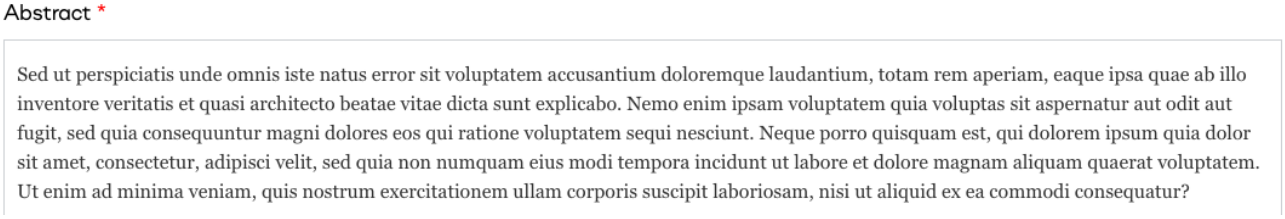
In the *#Presenter ID field*, enter the number only (without the # symbol). Verify the presenter's ID before submitting.

AUTHORS AREA



- Make sure you enter the family name and given name in the appropriate fields and do not swap them.
- Many affiliations are already available in the database. Start typing your affiliation. If no results appear in the pop-up list, click **'+'** to add a new one.
- Enter only the name of the main institution, city, and country. Additional details are unnecessary

ABSTRACT AREA



- It is not possible to specify the exact number of characters available for the abstract text, as this depends on the length of the title, the number of authors and affiliations, and the number of references.
- As a general guideline, if your abstract has a two-line title, three lines for the authors' names, three lines for affiliations, and four references, you will have approximately 520–550 words, or 3,700–3,800 characters (including spaces), available for the abstract text.
- Always submit your abstract as a **draft** first. This will allow you to generate a PDF by clicking the **Acrobat icon**, check for errors (pay particular to the symbols!), and make sure that the abstract does not exceed **one page**.

REFERENCES AREA

Please follow these guidelines when preparing your reference list.

- Do not number the references. The software will do it for you.
- Format the references as follows: Surname1 N.S., Surname2 T.N., Surname3 N. (2013). Journal, pages.
- No spaces between initials.
- Do not include paper titles.
- No comma between the journal name and volume number.
- Do not abbreviate journal names.
- You can reorder the list by drag and drop.

This window appears when you enter the Abstract section.
